

MAZDAK ABULNAGA

32 Vassar Street, 32-D472, Cambridge, MA, 02139, USA • abulnaga@mit.edu • 1-617-335-2581

EDUCATION

Ph. D., Massachusetts Institute of Technology (MIT)

Cambridge, MA

June 2018 – Present

Electrical Engineering and Computer Science
Advisor: Polina Golland and Justin Solomon

S.M., Massachusetts Institute of Technology (MIT)

Cambridge, MA

September 2016 – June 2018

Electrical Engineering and Computer Science
Thesis: Volumetric Mesh Parameterization of the Placenta to a Canonical Template
Advisor: Polina Golland and Justin Solomon
GPA: 4.9/5.0

B.A.Sc., University of British Columbia (UBC)

Vancouver, B.C.

September 2011 – May 2016

Electrical Engineering (with Co-op), Minor in Commerce
Graduated with Distinction, ranked 1st in the department of Electrical and Computer Engineering
GPA: 4.33/4.33

RESEARCH EXPERIENCE

Philips Research North America

Cambridge, MA.

Supervised by Jonathan Rubin

June 2018 – Present

- Developing a deep learning model to automatically segment ischemic stroke lesions in Computed Tomography (CT) scans of the brain

MIT: Computer Science and Artificial Intelligence Laboratory

Cambridge, MA.

Supervised by Polina Golland and Justin Solomon

September 2016 – Present

- Developing a common coordinate system for functional mapping of the placenta by digitally “flattening” fetal MR images of the organ through a piecewise-affine transformation
- Performing statistical analysis to identify factors that affect placental health in-vivo, and to improve visualization of the organ for clinicians to investigate placental function and pathology

UBC: Pediatric Anesthesia Research Team

Vancouver, B.C.

Supervised by Mark Ansermino

May 2013 – August 2016

- Led a research project that aims to improve the treatment and diagnosis of pneumonia in children of the developing world by developing a low-cost wheezing detection system
- Recruited 41 research subjects for respiratory sound analysis at the BC Children’s Hospital
- Developed a low-cost electronic stethoscope to be used in low-resource settings
- Developed a novel algorithm to identify wheezing in respiration through a Synchrosqueezing transform by classifying wheezing and normal breathing in children. Manuscript in preparation

UBC: Electrical and Computer Engineering in Medicine

Vancouver, B.C.

Supervised by Guy Dumont

May 2012 – April 2016

- Worked on MobileKids, a research project that aims to reduce sedentary lifestyle in youth by developing an active smartphone game
- Led the feasibility study on a group of 60 children by developing the study protocol, meeting with subjects and distributing devices, and collecting and preparing the data for processing

The Johns Hopkins University: Image Analysis and Communications Lab

Baltimore, MD

Undergraduate Research Assistant, supervised by Jerry Prince

May – July 2015

- Developed a graphical user interface (GUI) toolbox in MATLAB that enables medical researchers to visually explore the shape change patterns of the cerebellum (part of the brain) associated with cerebellar disease and function loss
- Performed statistical analysis on landmark shape representations of the cerebellum to study the correlation between cerebellar shape change and function loss, and the patterns of shape change in specific disease type

TRIUMF – Canada’s National Nuclear and Particle Physics Laboratory

Vancouver, B.C.

Supervised by Ruediger Picker

January – May 2015

- Worked on an international collaborative research project that is attempting to quantify the electric dipole moment of the neutron by developing an ultra-cold neutron experiment
- Developed and ran simulations of the experiment using PENTrack (Monte Carlo-based tool) and analyzed the results using ROOT

TECHNICAL WORK EXPERIENCE

Chevron Canada Ltd.

Burnaby, B.C.

Electrical Engineering Co-op Student

April – November 2014

- Managed and designed the electrical side of an environmental system project comprising an electric motor, a transformer, electric heat tracing, and DCS-relayed safety instrumentation
- Prepared a through commissioning and maintenance manual for a 75kVA uninterruptable power supply (UPS) and directed electrical contractors during the commissioning of the UPS

SELECTED PRESENTATIONS

1. Volumetric Mesh Parameterization of the Placenta to a Canonical Template, *EECS Masterworks*. Poster. Cambridge, MA, USA. 2018. **Morris Joseph Levin Award.**
2. Volumetric Mesh-based Mapping of the Placenta to a Canonical Template for Visualization of Regional Anatomy and Function, *International Society for Magnetic Resonance in Medicine*. Poster. Paris, France. 2018
3. Mapping of the Placenta to a Canonical Template for Visualization of Regional Function, *International Society for Magnetic Resonance in Medicine Workshop on MRI of the Placenta*. Atlanta, GA, USA. 2018.
4. A toolbox to Visually Explore Cerebellar Shape Changes in Cerebellar Disease and Dysfunction, *International Society for Optics and Photonics Medical Imaging*. Poster. San Diego, CA, USA. 2016
5. Do I Wheeze? Utilizing Respiratory Sounds to Develop an Algorithm for Detecting Wheeze. *Child and Family Research Institute Summer Student Poster Day*. Poster. Vancouver, BC, Canada. 2013. **Best poster award.**

AWARDS

Morris Joseph Levin Thesis Presentation Award	2018
NSF Graduate Research Fellowship (GRFP)	2018
NSERC Postgraduate Scholarship (PGS-D)	2018
Siebel Fellowship	2017
Association of Professional Engineers and Geoscientists Gold Medal in Engineering	2016
Elizabeth and Leslie Gould Scholarship in Engineering	2016
Matti Niit Memorial Prize in Electrical Engineering	2016
UBC Dean’s Honour List	2016
UBC Scholarship	2012-15
Jim and Helen Hill Memorial Service Award in Electrical Engineering	2015
Fluor Canada Ltd. Award in Electrical Engineering	2015
Child & Family Research Institute Summer Studentship (Declined, in favor of NSF REU)	2015
Charles and Jane Banks Scholarship	2015
Sherwood Lett Memorial Scholarship (Premier Undergraduate Scholarship)	2014-15
UBC Westbrook Scholar	2014
Western Canada Group of Chartered Engineers Prize	2014
UBC Trek Excellence Scholarship	2013,2015
Edward and Aldine Madsen Scholarship	2013
Best Poster in the Child & Family Research Institute Summer Student Poster Day	2013
NSERC Undergraduate Student Research Award	2013
Peter Wall Institute for Advanced Studies Student Solutions Initiative	2012
UBC President’s Entrance Scholarship	2011

LEADERSHIP

EECS Graduate Student Association (GSA): President

October 2017 – Present

- Developing a \$50,000 budget for academic, social, orientation and recruiting events for the EECS graduate student body containing over 600 graduate students
- Organizing weekly meetings with the GSA executive committee to plan events and future for plans for the organization
- Acting as a liaison between the department leadership and graduate students, helping plan academic and organizational changes

EECS GSA: Sports Chair

November 2016 – October 2017

- Organized intramural sports for EECS graduate students
- Organized graduate student outings to see Boston professional sports team games
